

Ambitious tech talent with a flair for back-end and front-end development!

Are you on your last year of studies and looking for a job with an opportunity to be extended to a fulltime developer? Are you a skilled full stack developer who wants to kick start your career in a fast-growing company with the best tools to develop your career? At Kaplan we are currently looking for a full stack developer with a passion for both front-end and back-end development.

We offer:

We guarantee a steep learning curve in an industry with high competition and exciting projects. Technology keywords include *Java, JavaScript, data modelling, system integrations, Adobe Marketing Cloud* and *Agillic*. We offer a part time job in a company that is fast-growing with the opportunity to develop your career fast. Your everyday will take place in the center of Copenhagen with ambitious colleagues with great diversity who are always ready to spare. The position allows flexibility for you to be able to effect which direction you want to go. You will get the chance to work with big clients and have your fingerprint in the development process. Your main tasks are assisting and cooperating with our fulltime developers, consultants, and clients, but will be very diverse with different tasks and customer relations.

"Kaplan is great because we have a dynamic and ambitious atmosphere where you can always improve through the diversity of the projects and people"

- Norbert, developer at Kaplan

What is necessary:

We are looking for a part-time developer with relevant job experience. You understand coding from scratch and are not afraid of challenging established processes and frameworks. You thrive in technical environments and have solid English or Danish communication skills. We're looking for a developer who is motivated equally by pushing pixels and diving into complex data models

Your profile:

- You are ending your bachelor or on your masters within IT, data or programming e.g. within software development, computer science or similar with a few years left of studies
- You have relational database knowledge
- You're comfortable working with HTML, CSS, and JavaScript
- You have experience working with Java or comparable languages
- Knowledge of REST API is appreciated
- You have a flexible and proactive approach with an eagerness to solve complicated challenges
- You have the ability to manage in an environment of constant change
- You have a problem-solving mind-set and are open to new challenges
- You are a team-player who contributes with good energy to our team

About Kaplan:

The trend is clear – Companies who wants to be measured in the competition must see the customer in an entirely new way. To create customer experiences based on data, there is a need for solutions combined with analyses, technic and communication. Kaplan is the leader of this evolution in the North and is now searching for additional competences.

The office in Copenhagen started back in 2013 and is a fast-growing company, which is why you will have the chance to put your mark in the company and have an indispensable role in our team.

Start:

As soon as possible.

Positiontype:

Part time position as a Junior developer/tech talent (15-25 hours per week)

Application:

Last application date: February 23rd 2018

Interviews will be held ongoing, so send your application and CV to Teresa.nguyen@kaplan.cph.dk
